

Fibrelyte™ valve boxes are engineered for a greater strength-to-weight ratio than plastic products. Ideal for turf and walkway applications, Fibrelyte enclosures are capable of withstanding incidental traffic from vehicles, such as light trucks.*

Fibrelyte boxes achieve greater load capacity than similar plastic sizes. Plus, the durable composite material of intertwined glass fibers maintains comparable weight as similar plastic sizes. This allows installers to utilize the same resources for handling and cutting Fibrelyte boxes as needed for plastic boxes.

* All Fibrelyte models meet ANSI/SCTE 77 standards for Tier 8 load ratings.

Flush Covers
with slip resistant texture

Superior Load Capacity than Plastic
in a light-weight, easy-to-handle material

Lock Options
available for added security

UV Inhibitors
help resist damage from exposure to sunlight

Rated for Tier 8
in all sizes for a variety of installation conditions

Defined Mouseholes
ready-to-cut as needed in select models

Easy to Modify
in the field with a simple hole saw

Select Lids & Bodies Available in Green, Grey and Purple
