Overview

Experience the Sta-Kon® advantage!

Thomas & Betts developed the first tool-applied solderless terminals and connectors more than 70 years ago in response to industry awareness of the need for better performance of electrical systems.

Key Features and Benefits

- Metal insulation grip sleeve is included on all nylon terminal for strain relief
- Long barrel selectively annealed
- CSA Certified
- UL Listed unless otherwise specified

Deep Internal Serrations

After the insertion of a wire into the terminal's barrel, a deep, serrated interior ensures a large area of contact that lowers the resistance of a connection. With the mechanical force of the tool, the wire strands cold flow into the serrated interior. This guarantees electrical resistance lower than the wire to which it is applied. This feature also prevents pullout from vibration and mechanical strain. Deep internal serrations can be compared to the effective holding power of a well-treaded tire on a wet highway.

Funneled Terminal Barrel Entry

This feature makes wire insertion faster and easier. A funneled barrel eliminates wire strand "hang up" upon insertion into the terminal's barrel. The loss of even a couple of wire strands can have negative results on electrical efficiency and resistance to mechanical strain.

Sta-Kon® Long Barrel Design

If lowering electrical resistance, preventing wire pullout, eliminating a "missed" crimp and having an insulator that stays on the barrel during installation are your goals, then you must design a terminal with a long barrel. This also provides the insulator with additional surface area, holding tight to the barrel. Most competitive barrel lengths range from 20–50% shorter than Sta-Kon® terminals. The results are usually a stream of electrical failure, rework and added expense. Many competitive insulators come off during crimping due to a limited barrel length.

Note: Listed for solid wire up to #10 AWG, terminals only.

Overview

Why Sta-Kon® Terminals are Better

Selective Annealing

Because of the mechanical strength of copper, an installer can experience fatigue associated with repeated installations. For this reason Thomas & Betts puts our terminals through one more step called selective annealing. This process leaves the barrel soft enough to crimp and form around the wire. However, we “cold form” the tongue during the manufacturing process so it remains strong. This is done so the tongue can withstand repeated bends and bolt tightening strain common in most electrical installations. Many competitors attempt to accomplish similar goals by removing valuable material or using a softer copper which has lower conductivity. This increases electrical resistance as well as the odds for shorting and downtime.

Anti-Rotational Tongues

This is a unique feature to the Thomas & Betts ring tongue terminal. This design prevents terminal shorting by keeping the terminal secure in the terminal block. The installer can place a greater number of terminals closer together without worry.

Proper Identification

We identify all terminals with Thomas & Betts initials, T&B. We also indicate wire and stud sizes. These markings are clearly visible on the surface of the tongue, taking any guesswork out of replacing or reordering additional parts. Our superior bright plating also assists in visibility.

All Sta-Kon® Terminals are Deburred and Degreased

To ensure a Sta-Kon® terminal is properly plated and insulated, all our parts are put through a process which cleans and smooths the terminal of any manufacturing residues, mainly grease, oils and sharp edges. Many competitive products do not put their product through such rigorous finishing.

Platings/Finish

Electroplated-Tin is standard. All others require minimum order quantities and are generally not stocked. Alternative platings as follows: Gold, Silver, Tin-alloys, Nickel, etc.

The following finishes are available on most one-piece Sta-Kon® terminals:

Finish	Suffix	Spec.	Temp. Rating
Gold Plate	GP	MIL-G-45204 Type II, Grade B, C, D, Class O	260°C
Nickel Plate	NP	QQ-N-290 Class 2, Grade G	260°C
Plain Finish	PF	None	150°C
Silver Plate	SP	MIL-T-16366 Type I, or II, 400°F, 204°C	150°C
Tin Plate	TP	MIL-T-10727 Type I	150°C

To order, add the indicated suffix to the regular catalogue number.

Underwriters Laboratories Listing

Sta-Kon® Rings, Forks, Locking Forks, two-way splices and disconnects are tested and listed to UL standards and all applicable products to CSA standards.

• Deep Internal Serrations.

- Flat bottom box
- Electro-tin plating
- Center reinforced spring detent for minimum insertion force
- Compound Spring Rails provide positive contact after repeated insertions

Overview

Sta-Kon® Ring, Fork and Locking Fork

- Complete line of installing tools engineered to match tool with terminal
- First to gain military approval for pressure connections ... many styles available for military applications
- Sta-Kon® products exceed test specification requirements of military, UL and CSA
- Fluoropolymer and Nylon Terminals provided with extra metal sleeve to grip insulation
- Vinyl insulated and bare Sta-Kon® terminals feature brazed seam wire barrels which can be crimped at any place on the barrel circumference
- Ring and Fork terminals can be used with solid wire as follows:
Non-Insulated: 22-8 gauge
Insulated: 22-10 gauge

ERG4001

Sta-Kon® Disconnects

- Internal barrel serrations and long barrel provide for maximum tensile strength
- Complete line of installing tools, engineered to match tool with terminal
- Funnel entry insulators allow for easier inserting of wire into barrel
- Colour-coded for easy installation

The Shure-Stake® Tools are Matched to Terminals

The Shure-Stake® mechanism prevents the dies from releasing the terminal until the proper compression has been completed. With this method, an operator achieves a reliable crimp everytime. Thomas & Betts' tooling techniques correctly match tools, wire size and terminal to produce optimum mechanical and electrical performance.

Overview

Thomas & Betts is pleased to announce that Sta-Kon® RA, RB and RC insulated quick disconnect products are now UL Listed at 600 volts.

Sta-Kon® Technical Data

Terminals & Splices Insulation Rating	UL 94 Flammability	Voltage	Temperature
Nylon	V-2	600V	105°C
Vinyl	V-0		
TEFZEL®	V-0		
Disconnects (non-insulated)		300V	

TEFZEL® is a registered trademark of DuPont.

The Sta-Kon® Terminals Numbering System

Distributor Package 100/50

Bulk "O.E.M." Packaged 1000/500

Common to Both Packages

- Letter **A** denotes 22-18 AWG wire range = Red
- Letter **B** denotes 16-14 AWG wire range = Blue
- Letter **C** denotes 26-22 AWG, 12-10 AWG wire range = Yellow
- Letter **R** preceding the above letters indicates the terminal is insulated
- No letter **R**... no insulation ... no exception!

Distributor Packaged

Part numbers are very descriptive indicating insulation and type, stud size, tongue style and the largest maximum wire that can be put inside.

- If the letter **R precedes** the number, the part is nylon insulated – RA18-6
- If the letter **R follows** the number, the part is vinyl insulated – 14RB-8

EXAMPLE: 10RC-8F

C – Indicates 12-10 AWG

10RC – Vinyl Insulated

8 – Indicates stud size

F – Means a fork tongue terminal

FL – Would indicate locking fork

EXAMPLE: 2RA18X

2 – Indicates a 2 way or butt style connector

X – Means expanded insulation

Ring Terminals

- Complete line of installing tools engineered to match tool with terminal
- First to gain military approval for pressure connections... many styles available for military applications
- Sta-Kon® products exceed test specification requirements of military, UL and CSA
- Include extra metal sleeve to grip insulation
- Vinyl insulated and bare Sta-Kon® terminals feature brazed seam wire barrels that can be crimped at any place on the barrel circumference
- Can be installed with crimping tools having a single indenter or double indenter (recommended for solid wire)
- Serrated barrel increases grip on wire
- Wire range identification on the tongue of each terminal
- Constructed of electrolytic copper for high conductivity

Fork Terminals

- Fork terminals enable easy installation because the mounting screw does not have to be completely removed
- Brazed-seam barrel is serrated for high pull-out value
- Terminal is high-conductivity electrolytic copper, electro-tin plated. Insulation is colour-coded
- Vinyl-insulated fork terminals have extra-long PVC insulation sleeve for protection and stress relief at wire's flex point

Pin Terminals

- Provide an easy and effective way to terminate stranded wire into European/metric style terminal blocks
- Designed to prevent shorting, wire strand loss and/or wire pullout resulting from improper termination of stranded wire
- Designed to meet emerging global standards which require wire-to-metric style terminal block installations be terminated with a “pin” style terminal
- Available in vinyl insulated, nylon insulated, and non-insulated styles
- All styles offered in 22 AWG to 10 AWG and compatible with existing Sta-Kon® tooling

Parallel Splices

- Wires are laid side by side in the connector, and the connection is made in one crimp
- Offer advantages in simplicity of installation and small size
- One crimp completes the splice

Installation Procedure for "PT" Connectors

Twist wires, insert through serrated barrel of wire joint. (PT60M, PT70, PT70M, PT80.)

Crimp and trim off excess wire with WT161M hand tool.

Screw PT6M insulator firmly onto PT160M barrel.

Wire Joints

High-Temperature Wire Joints

- Rated for temperatures up to 150°C (302°F), 600 V maximum
- Molded, one-piece nylon construction for electrical insulation, UL94-V2
- Brazed copper sleeve prevents separation of connection during crimping
- Internal serrations enable cold flow for increased conductivity and pull-out strength

Heat-Shrinkable Terminals, Splices and Disconnects

- These ring terminals, butt splices and disconnects are self-insulated with heat-shrinkable polyolefin and internally coated sealant
- Upon completed installation, a fully sealed connection is achieved to protect the joint against the degrading effects of galvanic action, corrosion and environmental exposure

Note: Not approved for outdoor use

STAPOUCH-HS	Heat-Shrink Terminal Kit with Tools	1

Disconnects and Male Tabs

- Internal barrel serrations and long barrel provide for maximum tensile strength
- Complete line of installing tools, engineered to match tool with terminal
- Funnel-entry insulators enable easier inserting of wire into barrel
- Colour-coded for easy installation

250 Series – Female Disconnects

- Female disconnect terminals and matching male tabs accommodate a range of #22–#10 AWG, and are available in non-insulated, partially insulated and fully insulated styles, in both nylon and vinyl
- Unique construction of the female disconnect offers long-term dependability
- Brazed-seam serrated barrel provides maximum tensile strength

187 Series – Female Disconnects

- Quick, reliable method of connection to terminal blocks and boards without the use of tools
- Female disconnect terminals and matching male tabs accommodate a range of #22–#10 AWG, and are available in non-insulated, partially insulated and fully insulated styles, in both nylon and vinyl
- Unique construction of the female disconnect offers long-term dependability

Push-In Luminaire Disconnect

Disconnect ballasts under load for safe servicing — in compliance with NEC® requirements

Each year, electricians sustain injuries while attempting to change ballasts without tripping the breaker because they're trying to avoid disconnecting other lighting and equipment from power. That's why recent changes to NEC® and UL standards require a means of disconnecting power to non-residential fluorescent lighting ballasts.

In 2006, Thomas & Betts developed the first UL Listed product to meet this need. Now, in response to customer demand, the new Sta-Kon® Push-In Luminaire Disconnect provides all the same safety benefits as the original, but installs even faster and easier.

- Enables electricians changing ballasts to easily disconnect incoming power for safe servicing without having to trip the main power breaker
- Installs easily — just strip de-energized wires and insert
- Disconnect halves snap together and separate easily — but won't accidentally disconnect
- Foolproof design eliminates the potential for incorrect installation and reverse polarity
- Fits through 1/2 in. knockouts for easy retrofit
- Ballast hot-lead wire entry is colour-coded black for easy visibility
- Finger-safe on both sides
- For use in all non-residential fluorescent lighting applications and in ordinary location HID lighting applications — both up to 600V, 4A maximum
- Complies with NEC®, CEC, UL and CSA requirements
- Sold in mated pairs (male/line and female/load sides)

Specifications

- Housing: Polycarbonate
- Temperature Rating: 105°C (221°F) max.
- Electrical Rating: 600 V, 4 A max.
- Flammability Rating: UL94V-2
- Contacts: Copper alloy
- Wire Range: #18–#12 AWG solid copper
#14–#12 AWG stranded copper (19 strands or fewer)
- Standards: Complies with 2008 NEC® 410.130(G) and CEC 30-308(4)
- Certifications: UL Listed, CSA Certified

This cutaway shows how the Sta-Kon® Luminaire Disconnect grips and holds the pushed-in wires securely after installation

Sta-Kon® Push-In Luminaire Disconnect

Cat. No.	Description	Std. Pkg. Qty.
LD2P-Q	2-Wire Push-In Luminaire Disconnect, Distributor Pack	25
LD2P-D	2-Wire Push-In Luminaire Disconnect, Bulk Packaging	500

Note: If you prefer lead wires instead of a push-in design and/or need a 3-wire disconnect for switching or dimming applications, order the original Sta-Kon® Luminaire Disconnect, 2-wire Cat. No. LD2 (Cat. No. LD2-D for bulk packaging) or 3-wire Cat. No. LD3 (Cat. No. LD3-D for bulk packaging). See following page.

Luminaire Disconnects

Ordering Information

Cat. No.	Description
LD2C-D	2-pole luminaire disconnect (marrettes not included)
LD3C-D	3-pole luminaire disconnect (marrettes not included)
LD2-C	2-pole luminaire disconnect (2 x 4 marrettes 333 /inner bag)
LD3-C	3-pole luminaire disconnect (6 of each marrettes (331 + 333) /inner bag)

Packaging Options

	Cat. No.	Pkg. Format	Std. Pkg. (Min./Mult.)	
BULK	LD2C-D	Box	Sold without marrettes	Inner: 50 per inner bag Outer: 250 per outer box
	LD3C-D	Box	Sold in multiple of 500	Master: 500 in master box
KITS	LD2-C	Bag	Sold with marrettes	Inner: 2 per inner bag Outer: 20 per outer box
	LD3-C	Bag	Sold in multiple of 20	Master: 200 in master box

Disconnect Installation Tool

Faster, easier and safer than manual seating of disconnects!

- Perfect for wire-harness assemblers and panel builders
- Dual-ended with slots to fit red and blue (male and female) or yellow disconnects
- Colour-coded dots for easy matching of disconnect with correct tool end
- Lightweight and only 5-1/8 in. long — fits in a shirt pocket like a pen

This one-of-a-kind tool may be used to seat all sizes of Thomas & Betts disconnects.

Cat. No.	Description	Pkg. Qty.
DT22-10	Sta-Kon® Disconnect Installation Tool	1

Insulated Ferrules

Features

- Ferrules ensure reliable electrical connections when terminating conductors in screw clamp terminal blocks
- Fraying and breaking of wire strands is prevented and the possibility of an unreliable connection is minimized
- Insulated ferrules prevent conductor breakage due to bending, wire stress or vibration, while facilitating wire insertions into the terminal block clamp
- Ferrules are the preferred alternative to twisting wire stands or tinning the wire end before terminating into a terminal block
- Ferrules are thin-walled copper tubes, which are mechanically crimped onto the ends of stranded wires
- They are easy to use — simply strip the wire, slide the ferrule onto the end of the wire and crimp
- Meets emerging global standards, requiring wire-to-metric style terminal block installations to be terminated with a “pin” style terminal

- Vinyl insulated, nylon insulated, and non-insulated styles
- All styles offered in #22 AWG to #10 AWG and compatible with existing Sta-Kon® tooling

How to Apply a Ferrule

- Strip the insulation from the end of the wire and insert into the insulated end of the ferrule
- Using the designated crimping tool, place the metal shaft into the tool's appropriate slot. Compress the tool to make a crescent-shape depression along the length of the ferrule
- Insert the crimped ferrule into the terminal block
- Tighten the ferrule and wire into the terminal block

Materials

- High-conductivity copper
- Tin plating

Sta-Org™ Terminal and Splice Organizer Kit Lightweight, durable, nylon construction!

- Ideal for contractors, OEMs or any other user of terminals and splices
- Slips in a tool box or sits on your bench — only 6.6 in. L x 3 in. dia.
- Bench-mountable (hardware included) Kit Contents
 - (1) blue nylon organizer/carrier
 - (6) see-through nylon canisters with lids
 - (20) #12–#10 AWG vinyl ring terminals (Cat. No. 10RC-10)
 - (25) #18–#14 AWG vinyl ring terminals (Cat. No. 14RB-10)
 - (15) #12–#10 AWG vinyl butt splices (Cat. No. 2RC-10X)
 - (25) #18–#14 AWG vinyl butt splices (Cat. No. 2RB-14X)
 - (20) #12–#10 AWG vinyl fork terminals (Cat. No. 10RC-10F)
 - (25) #18–#14 AWG vinyl fork terminals (Cat. No. 14RB-10F)

Installing Kits

Terminal Kits

For residential or light commercial installations we recommend this proven assortment of popular Sta-Kon® vinyl terminals. This kit includes a WT112M crimping tool.

Kit contains

- 36 2RA18X butt splices for 22 - 16 AWG
- 36 18RA-8F fork terminals for 22 - 16 AWG
- 36 18RA-10F fork terminals for 22 - 16 AWG
- 36 18RA-8 ring terminals for 22 - 16 AWG
- 36 18RA-10 ring terminals for 22 - 16 AWG
- 36 RBB217-200 butt splices for 16 - 14 AWG
- 36 14RB-10F fork terminals for 18 - 14 AWG
- 36 18RA-250F disconnects for 22 - 18 AWG
- 36 14RB-8F fork terminals for 18 - 14 AWG
- 36 14RB-8 ring terminals for 18 - 14 AWG
- 36 14RB-10 ring terminals for 18 - 14 AWG
- 25 RCC217-250 butt splices for 12 - 10 AWG
- 25 10RC-8F fork terminals for 12 - 10 AWG
- 25 10RC-10 ring terminals for 12 - 10 AWG
- 20 RC6 wire joints
- 1 WT112M crimping tool
- 50 833 wire connectors yellow #22-#8 AWG

Cat. No.	Description	Pkg. Qty.
SK-CLASSIQUE	Terminal Kit	1

STAKIT Installing Kit

Perfect for residential or light commercial installations!

- Assortment of popular Sta-Kon® vinyl terminals
- Kit includes a WT112M crimping tool
- Includes cable ties and wire marker book

Kit contains

- 100 2RA18X butt splices for 22 - 18 AWG
- 100 2RB14X butt splices for 18 - 14 AWG
- 50 2RC10X butt splices for 12 - 10 AWG
- 50 10RC-10 ring terminals for 12 - 10 AWG
- 50 10RC-10FL locking fork terminals for 12 - 10 AWG
- 50 10RC-250F disconnects for 12 - 10 AWG
- 100 14RB-10 ring terminals for 18 - 14 AWG
- 100 14RB-8FL locking fork terminals for 18 - 14 AWG
- 100 14RB-250F disconnects for 18 - 14 AWG
- 100 18RA-8F fork terminals for 22 - 18 AWG
- 100 18RA-6FL locking fork terminals for 22 - 18 AWG
- 100 18RA-250F disconnects for 22 - 18 AWG
- 1 WM-0-THRU9 wire marker book
- 1 WT112M crimping tool
- 100 TY525M Ty-Rap® cable ties (approx. length 7-1/2)

Cat. No.	Description	Pkg. Qty.
STAKIT	Assortment of Sta-Kon® vinyl terminals, splices and disconnects. Includes crimp tool, cable ties and wire book marker	1

Note: All splices, terminals and disconnects are vinyl insulated.

Installing Kits

Recommended Tools

The Shure-Stake® mechanism on mechanical ratchet tools and power tools prevents the dies from releasing the terminal until the proper compression has been completed. With this method, an operator achieves a reliable crimp every time. Thomas & Betts tooling techniques correctly match tools, wire size, and terminal to produce optimum mechanical and electrical performance.

Plier type if installations are fewer than 20 per day

Plier-Type Tools

Used for installation of various Sta-Kon® terminal series

Ratchet type if installations are more than 20 per day

Power type if installations are more than 200 per day

Cat. No.	Description	Pkg. Qty.
WT110M	A, B, C non-insulated terminals and splices and A, B non-insulated terminals with insulation grip	1
WT111M	A, B, C, PT non-insulated terminals and splices; includes cutters	
WT112M	A, B, C non-insulated and RA, RB, RC insulated nylon and vinyl terminals and splices; includes cutters	
WT161M	A, B, C, PT non-insulated terminals and splices; includes plier grip and cutters	
WT2000	A, B, C, AB, PT, RA, RB, RC insulated and non-insulated terminals and splices; includes wire cutters, bolt cutters and wire stripper	

Application Tools

The proper installation procedure for the quality-assured connection!

The proper installation of terminals, splices and connectors is very important to the efficient performance of an electrical system. The properly installed connector will enable good conductivity through the termination. Certain basic requirements must be met to make a good termination.

- Strip the insulation carefully to avoid nicking or cutting conductor strands
- Strip the insulation to the proper length so the conductors can be inserted fully into the connector barrel; the wire/cable should be visible in the inspection hole of the lug

A poor termination results in a high-resistance connection.

A poor connector installation may cause damage or failure of an entire system.

Installation Procedure

- Strip the insulation carefully to avoid nicking or cutting conductor strands.
- Strip the insulation to the proper length so the conductors can be inserted fully into the connector barrel; the wire/cable should be visible in the inspection hole of the lug.
- Train the wires to eliminate fanning of strands.
- Open handles fully.
- Insert terminal in proper die nest and locate it as shown on the right. When crimping a butt splice, position in proper die nest with window facing indenter.
- Close handles slightly to secure terminal. Do not deform terminal.
- Insert properly stripped wire into terminal.
- Complete crimp by closing handles.

Shure-Stake® tools are matched to terminals

ERG4001

Safety Warning: Keep fingers and hands away from mechanism during crimp function.

Application Tools

Redesigned family of termination tools sets a new standard for manual crimping tools!

The most comfortable crimp available from a manual compression tool!

Sta-Kon® Comfort Crimp™ Compression Tools previously set the standard for manual crimp tools. Now, Thomas & Betts engineers have made a great line of tools even better with the newly redesigned Sta-Kon® Comfort Crimp™ Compression Tools. We kept all the performance features that made the tools industry leaders such as the Shure-Stake® mechanism and interchangeable dies with colour-coded die nests, and focused on creating the best possible user experience in terms of comfort and reduction of strain.

Ergonomic handles position the user's hands correctly to minimize the risk of strain, and soft, over-molded grips cushion fingers and palm for user comfort. A new Crimp-Assist™ foot stabilizes the tool when the user needs to place it on a work surface for leverage to crimp larger connectors. Best of all, the redesigned Comfort Crimp™ tools require 25% less handle force to complete the crimp cycle than the previous generation — and up to 75% less handle force than competing tools!

Requiring the lowest handle force of any tool in its class, the new Comfort Crimp™ family provides maximum comfort to installers, without sacrificing the durability or performance associated with Thomas & Betts tools.

- Perfect for OEM, MRO and field use
- UL Listed for use with Sta-Kon® connectors
- Shure-Stake® mechanism ensures a complete crimp cycle before release for a proper crimp every time
- Colour-coded die nests for easy matching with Sta-Kon® insulated terminals
- Creates integrity dots for quick verification of proper crimp
- Advanced manufacturing methods for improved durability and tool life
- Lanyard hole in handle for easy tethering to workstation
- Calibration service available through T&B Tool Services

12060	C — Disconnect, Non-Insul.		

* Can also be used on nylon

Cat. No.	Description	Pkg. Qty.
12050	Compact, pneumatically operated unit for crimping tape-mounted Sta-Kon® terminals; equipped with a Shure-Stake® mechanism, which ensures a full compression each time	1

Space Requirement: 30 in. W x 20 in. H x 20 in. D
Weight: 55 lb.
Air Pressure: 90–125 psi input air supply

Application Tools

BAT22-6NV2 Battery-Powered Crimping Tool

The Sta-Kon® BAT22-6NV2 is motorized and automatic for effortless, single-lever crimping.

This is an excellent tool for various vertical markets including panel builders, system integrators, data centers, utilities and various other OEMs and MROs.

The lightweight, ergonomic design minimizes the risk of repetitive motion injuries that can occur with traditional hand crimping tools.

- 150,000 cycle lifespan
- Extremely light and efficient
- Crimps both Sta-Kon® and Dragon Tooth™ terminals
- Comes complete with extra battery, charger and carrying case
- Powerful lithium-ion battery with charge-level indicator
- Single-lever motorized operation for easy manual preclamping, automatic crimping and auto-retract functions
- Motor-stall protection in case of faulty operation
- LED work light illuminates work areas

Included Accessories

- Sturdy, plastic carrying case for portability
- Two 10.8 V lithium-ion batteries and battery charger
- Sturdy tray for convenient storage of crimp dies

Cat. No.	Description	Pkg. Qty.
BAT22-6NV2	Battery-powered crimping tool with two 10.8 V lithium-ion batteries	1
Die sets*		
DIE2001	Sta-Kon® insulated 22-10 AWG terminals	
DIE2002	Sta-Kon® non-insulated 22-10 AWG terminals	
DIE2005	Sta-Kon® non-insulated 16-14, 12-10, 8-6 AWG tubular terminals	
DIE2007	Sta-Kon® insulated 8-6 AWG tubular terminals	
DIE2009	Sta-Kon® wire joints RB, RC, RP series 22-10	
DIE2500	Spec-Kon™ insulated 22-10 AWG terminals	
DIE1806**	Dragon Tooth™ terminals 22F, L, R-6 series	

*Dies sold separately.

** DIE1806 is not CSA certified or UL Listed.

PAIR22-6 Air Crimp Tool

Heavy-duty portable tool

- 1.25 tons output force at 100 psi
- Crimps #22–#6 AWG terminals
- Installs Sta-Kon® terminals as well as ferrules and Dragon Tooth™ connectors
- Interchangeable dies
- Open yoke enables easy access to insert and remove terminals for crimping

Cat. No.	Description	Pkg. Qty.
PAIR22-6	Open yoke, hand actuated	1
Crimp Dies*		
DIE2001	Insulated #22–#10 AWG Sta-Kon® Terminals	1
DIE2002	Non-Insulated #22–#10 AWG Sta-Kon® Terminals	
DIE2005	Non-Insulated #16–#10/#8–#6 Sta-Kon® Terminals (Tubulaire Only)	
DIE2007	Insulated #8–#6 AWG Sta-Kon® Terminals (Tubulaire Only)	

* Dies sold separately.

Note: The dies for the BAIR22-6, PAIR22-6 and BAT22-6 are interchangeable.

Note: Battery-powered Tools BPI4230OCR, BPLT6BSCR and BPLT62BSCR can also be used to crimp non-insulated Sta-Kon® terminals.

Application Tools

BAIR22-6 Bench-Mounted Air Tool

Crimps #22–#6 AWG terminals!

- 1.8 tons output force at 100 psi
- Bench-mounted heavy-duty air tool
- Short cycle time
- Shure-Stake® mechanism
- Foot actuated
- Accepts T&B standard hand tool dies
- Installs Sta-Kon® and Spec-Kon™ terminals as well as ferrules and Dragon Tooth™ connectors

Cat. No.	Description	Pkg. Qty.
BAIR22-6	Heavy-duty, high-speed production tool installs a wide range of Sta-Kon® terminals, from #26–#6 gauge; uses the DIE2000 Series dies for both non-insulated and insulated terminals; supplied complete with foot pedal, air hose/air lubricator	1
Crimp Dies*		
DIE2001	Insulated #22–#10 AWG Sta-Kon® Terminals	1
DIE2002	Non-Insulated #22–#10 AWG Sta-Kon® Terminals	
DIE2005	Non-Insulated #16–#10/#8–#6 Sta-Kon® Terminals (Tubular Only)	
DIE2007	Insulated #8–#6 AWG Sta-Kon® Terminals (Tubular Only)	

* Dies sold separately.

Note: The dies for the BAIR22-6, PAIR22-6 and BAT22-6 are interchangeable.

Note: Battery-powered Tools BPI42300CR, BPLT6BSR and BPLT62BSR can also be used to crimp non-insulated Sta-Kon® terminals.

Air-Operated Bench-Mounted Tool

Crimps #8 AWG–250 kcmil!

Convenience and Economy

The tool accepts a full range of interchangeable dies, the same as used in the TBM6 or TBM6S tools. To install the dies, simply pull the spring-loaded pin and remove the indentor die. Then, flex the retaining spring and remove the die nest.

Shure-Stake® Mechanism Means Quality Connections

The Shure-Stake® mechanism senses inlet air pressure, and if insufficient, is designed to prevent the tool from cycling. Thus you avoid “undercrimping.” An 85–90-psi air pressure source is required.

Safety Features Increase Productivity, Reduce Downtime

Safety features include a guard over the die area, an air shutdown switch activated by a slight push with the finger and a foot pedal that’s enclosed to prevent accidental tool operation. In addition, the tool may be bench-mounted for stability and control. For convenience when crimping large size terminals on heavy wire, the head assembly may overhang the workbench.

Cat. No.	Description	Pkg. Qty.
25000	This compact heavy-duty air tool installs nylon insulated Sta-Kon® terminals on wire sizes from #8 AWG to 250 kcmil; non-insulated styles are also installed just as quickly and dependably; heavy-duty air tool installs non-insulated and insulated Sta-Kon® terminals from #8 AWG to 250 kcmil	1

Note: This tool uses the same dies as the TBM6 and TBM6S hand tools on page B45.

Application Tools

12-Ton Hydraulic Head

Installs insulated and non-insulated Sta-Kon® Terminals!

12-Ton Crimping Tool (Military Spec. MS25441-1)

Military listed and 12 tons of crimping power!

Cat. No.	Description	Pkg. Qty.
13400	12-ton crimping tool supplied with adapter TBM12D-AR is used for installing both insulated and non-insulated Sta-Kon® terminals #8 AWG to 250 kcmil (dies ordered separately)	1

Cat. No.	Description	Pkg. Qty.
13642M	Hydraulic-operated 12-ton tool installs #8 AWG through 250 kcmil Sta-Kon® terminals (dies ordered separately)	1

Application Tools

13600 Electric Hydraulic Pump

- Designed for use with single-acting cylinders and tools rated for 10,000-psi operation
- Supplied with metal carrying case
- 13620 hand switch and 13619 hydraulic hose, both sold separately, required for operation

Specifications

- Motor: 1/2 hp, 115V 50–60 Hz, 10 amps
- Pumping Capacity:
 - 170 cu. in./min. at 100 psi
 - 32 cu. in./min. at 1,000 psi
 - 25 cu. in./min. at 5,000 psi
 - 18 cu. in./min. at 10,000 psi
- Reservoir Volume: 104 cu. in. (0.45 gal.)
- Basic Pump Dimension: 6 in. x 8 in. x 16 in.
- Weight: 25 lb.

Cat. No.	Description	Pkg. Qty.
13600	Electric Hydraulic Pump — hand or foot switch and nonmetallic hose (sold separately) required for operation	1

13610A Electric Hydraulic Pump with Shure-Stake® Control

- Shure-Stake® control mechanism requires 9,800-psi pump pressure before recycling to prevent under-crimping
- Designed for use with single-acting cylinders and tools rated for 10,000-psi operation
- Supplied with metal carrying case

Specifications

- Motor Rating: 1/2 hp, 115V, 50–60 Hz, 12.5 amps
- Pumping Capacity:
 - 170 cu. in./min. at 100 psi
 - 32 cu. in./min. at 1,000 psi
 - 25 cu. in./min. at 5,000 psi
 - 18 cu. in./min. at 10,000 psi
- Reservoir Volume: 104 cu. in. (0.45 gal.)
- Basic Pump Dimension: 8-1/2 in. x 10-1/2 in. x 16 in.
- Weight: 35 lb.

Cat. No.	Description	Pkg. Qty.
13610A	Electric Hydraulic Pump with Shure-Stake® control — hand or foot switch and nonmetallic hose (sold separately) required for operation	1

Application Tools

13810 Heavy-Duty Electric Hydraulic Pump with Shure-Stake® Control

- Designed for perfect crimps every time in heavy-duty OEM applications
- Heavy-duty OEM two-stage pump with high flow rate
- Shure-Stake® control mechanism requires 9,800-psi pump pressure before recycling to prevent under-crimping
- Requires hand or foot control (sold separately)

Specifications

- Motor Rating: 1-1/2 hp, 115V, 60 Hz, 23 amps
- Pumping Capacity:
235 cu.in./min. at 200 psi
6 cu.in./min. at 8,000 psi
- Reservoir Volume: 462 cu.in./2 gal.
- Dimensions (L x W x H): 10-3/4 in. x 15 in. x 20-3/4 in.
- Weight: 60 lb.

Catamount® Terminals

Catamount® Terminals – Now in Convenient, Spillproof, Re-Usable Packaging!

While poly bags keep their contents dry, they don't offer much other protection, and they aren't environmentally friendly. That's why Catamount® terminals now come in sturdy plastic containers that safeguard the connectors inside against crushing and can be re-used or recycled when empty. T&B is always adding value to its products. With the introduction of a durable plastic container, the value of T&B's Catamount® terminals has been significantly enhanced. No more lost or spilled terminals because of inadequate packaging.

Catamount® Terminal Tools

WT111M

WT112M

ERG1-WS

CM2000A

TBM6S

Cat. No.	Description	Pkg. Qty.
WT111M	Pier tool with cutter for 22 - 10 AWG non-insulated terminals	1
WT112M	Pier tool with cutter for 22 - 10 AWG insulated and non-insulated terminals, splices and disconnects	
TBM6S	Toggle type hand tool with Shure-Stake® for 8 - 6 AWG, vinyl insulated terminals (dies sold separately)	
ERG1-WS	Ergonomic wire stripping tool	
CM2000A	10 in. ratchet crimping tool for insulated terminals (22 - 10 AWG)	

Polycarbonate Insulated Ring Terminals

Technical Information

Material	Electrolytic copper
Plating	Tin-plated
Marking	Wire size and bolt size stamped on the tongue
Metal barrel	Brazed seam to prevent barrel separation
Insulation	PC = Polycarbonate
Temperature resistance	+115°C / +125°C
Colour coding of the insulation	According to the wire size
Cable insertion	Easy entry

Vinyl Insulated Ring Terminals DIN 46237

Technical Information

Material	Copper
Plating	Tin-plated
Marking	Wire size and bolt size stamped on the tongue
Metal barrel	Brazed seam to prevent barrel separation
Insulation	PVC = Polyvinylchloride (Vinyl)
	Ideal for harsh environments, provides excellent chemical, impact and abrasion resistance
Max. electrical rating	+75°C 600 Volts max
Colour coding of the insulation	According to the wire size

Tools

- Ergonomic ratchet style hand tools used for installing insulated and non-insulated terminals
- Specially designed ergonomic handles distribute the crimping force more evenly across the user's hands. This helps to reduce the risk of Carpal Tunnel Syndrome, the cause of almost one in two industrial injuries
- Ratchet design greatly reduces handle forces over conventional hand tools and incorporates the Shure-Stake® mechanism which ensures a full crimp cycle every time
- Most dies incorporate wire range mark for easy inspection (insulated only)
- Colour-coded die nests (insulated only) make terminal and die nest selection easy
- The product design and engineering results in a long lasting precision tool
- Exists in 2 versions: with interchangeable dies or with fixed dies

Ergonomic Hand Tools with Fixed Die

Product Ref.: ERG2001A

Ergonomic fixed die tool, with three colour-coded die nests for easy selection

For **insulated terminals** from:

0.5 to 1.5 mm² red

1.5 to 2.5 mm² blue

4.0 to 6.0 mm² yellow

Shure-Stake™ mechanism

Length: 255 mm

Weight: 560 g

Product Ref.: ERG2510

Ergonomic fixed die tool with 2 die nests

For **insulated terminals** and **insulated bootlace ferrules**

from: 0.25 to 0.5 mm²

0.5 to 1.0 mm²

Shure-Stake™ mechanism

Length: 220 mm

Weight: 430 g

Tools

Metric Crimping Tools

An extensive range of tooling is available, suiting a variety of requirements, to crimp the following terminals:

- Insulated terminals and bootlace ferrules
- Non-insulated terminals
- Copper tube terminals

Different types of tooling are offered, depending on volume and application:

- Plier type hand tools for occasional applications (“Do-It-Yourself” users)
- Standard hand tooling for low to medium volume applications
- Ergonomic hand tooling for low to medium volume applications, where high, repeatable quality is essential
- Hydraulic tooling for heavy-duty applications
- Smart tools where no die change is necessary

Standard Crimping Tools

Product Ref.: WT52

Plier type tool

For **insulated** and **non-insulated** terminals from 0.5 to 6.0 mm²

Incorporates wire stripper and bolt cutters

Recommended for “Do-It-Yourself” applications only

Length: 225 mm

Weight: 200 g

Product Ref.: WT2124Y

Ratchet type hand tool, fixed die

For **insulated** and **non-insulated** terminals

from: 0.5 to 1.5 mm² red

1.5 to 2.5 mm² blue

4.0 to 6.0 mm² yellow

Built in **Shure-Stake®** mechanism to ensure a full compression every time

Length: 228 mm

Weight: 533 g

Overview

Experience the Sta-Kon® advantage!

Thomas & Betts developed the first tool-applied solderless terminals and connectors more than 70 years ago in response to industry awareness of the need for better performance of electrical systems.

Key Features and Benefits

- Metal insulation grip sleeve is included on all nylon terminal for strain relief
- Long barrel selectively annealed
- CSA Certified
- UL Listed unless otherwise specified

Deep Internal Serrations

After the insertion of a wire into the terminal's barrel, a deep, serrated interior ensures a large area of contact that lowers the resistance of a connection. With the mechanical force of the tool, the wire strands cold flow into the serrated interior. This guarantees electrical resistance lower than the wire to which it is applied. This feature also prevents pullout from vibration and mechanical strain. Deep internal serrations can be compared to the effective holding power of a well-treaded tire on a wet highway.

Funneled Terminal Barrel Entry

This feature makes wire insertion faster and easier. A funneled barrel eliminates wire strand "hang up" upon insertion into the terminal's barrel. The loss of even a couple of wire strands can have negative results on electrical efficiency and resistance to mechanical strain.

Sta-Kon® Long Barrel Design

If lowering electrical resistance, preventing wire pullout, eliminating a "missed" crimp and having an insulator that stays on the barrel during installation are your goals, then you must design a terminal with a long barrel. This also provides the insulator with additional surface area, holding tight to the barrel. Most competitive barrel lengths range from 20–50% shorter than Sta-Kon® terminals. The results are usually a stream of electrical failure, rework and added expense. Many competitive insulators come off during crimping due to a limited barrel length.

Note: Listed for solid wire up to #10 AWG, terminals only.

Overview

Why Sta-Kon® Terminals are Better

Selective Annealing

Because of the mechanical strength of copper, an installer can experience fatigue associated with repeated installations. For this reason Thomas & Betts puts our terminals through one more step called selective annealing. This process leaves the barrel soft enough to crimp and form around the wire. However, we “cold form” the tongue during the manufacturing process so it remains strong. This is done so the tongue can withstand repeated bends and bolt tightening strain common in most electrical installations. Many competitors attempt to accomplish similar goals by removing valuable material or using a softer copper which has lower conductivity. This increases electrical resistance as well as the odds for shorting and downtime.

Anti-Rotational Tongues

This is a unique feature to the Thomas & Betts ring tongue terminal. This design prevents terminal shorting by keeping the terminal secure in the terminal block. The installer can place a greater number of terminals closer together without worry.

Proper Identification

We identify all terminals with Thomas & Betts initials, T&B. We also indicate wire and stud sizes. These markings are clearly visible on the surface of the tongue, taking any guesswork out of replacing or reordering additional parts. Our superior bright plating also assists in visibility.

All Sta-Kon® Terminals are Deburred and Degreased

To ensure a Sta-Kon® terminal is properly plated and insulated, all our parts are put through a process which cleans and smooths the terminal of any manufacturing residues, mainly grease, oils and sharp edges. Many competitive products do not put their product through such rigorous finishing.

Platings/Finish

Electroplated-Tin is standard. All others require minimum order quantities and are generally not stocked. Alternative platings as follows: Gold, Silver, Tin-alloys, Nickel, etc.

The following finishes are available on most one-piece Sta-Kon® terminals:

Finish	Suffix	Spec.	Temp. Rating
Gold Plate	GP	MIL-G-45204 Type II, Grade B, C, D, Class O	260°C
Nickel Plate	NP	QQ-N-290 Class 2, Grade G	260°C
Plain Finish	PF	None	150°C
Silver Plate	SP	MIL-T-16366 Type I, or II, 400°F, 204°C	150°C
Tin Plate	TP	MIL-T-10727 Type I	150°C

To order, add the indicated suffix to the regular catalogue number.

Underwriters Laboratories Listing

Sta-Kon® Rings, Forks, Locking Forks, two-way splices and disconnects are tested and listed to UL standards and all applicable products to CSA standards.

• Deep Internal Serrations.

- Flat bottom box
- Electro-tin plating
- Center reinforced spring detent for minimum insertion force
- Compound Spring Rails provide positive contact after repeated insertions

Overview

Sta-Kon® Ring, Fork and Locking Fork

- Complete line of installing tools engineered to match tool with terminal
- First to gain military approval for pressure connections ... many styles available for military applications
- Sta-Kon® products exceed test specification requirements of military, UL and CSA
- Fluoropolymer and Nylon Terminals provided with extra metal sleeve to grip insulation
- Vinyl insulated and bare Sta-Kon® terminals feature brazed seam wire barrels which can be crimped at any place on the barrel circumference
- Ring and Fork terminals can be used with solid wire as follows:
Non-Insulated: 22-8 gauge
Insulated: 22-10 gauge

ERG4001

Sta-Kon® Disconnects

- Internal barrel serrations and long barrel provide for maximum tensile strength
- Complete line of installing tools, engineered to match tool with terminal
- Funnel entry insulators allow for easier inserting of wire into barrel
- Colour-coded for easy installation

The Shure-Stake® Tools are Matched to Terminals

The Shure-Stake® mechanism prevents the dies from releasing the terminal until the proper compression has been completed. With this method, an operator achieves a reliable crimp everytime. Thomas & Betts' tooling techniques correctly match tools, wire size and terminal to produce optimum mechanical and electrical performance.

Overview

Thomas & Betts is pleased to announce that Sta-Kon® RA, RB and RC insulated quick disconnect products are now UL Listed at 600 volts.

Sta-Kon® Technical Data

Terminals & Splices Insulation Rating	UL 94 Flammability	Voltage	Temperature
Nylon	V-2	600V	105°C
Vinyl	V-0		
TEFZEL®	V-0		
Disconnects (non-insulated)		300V	

TEFZEL® is a registered trademark of DuPont.

The Sta-Kon® Terminals Numbering System

Distributor Package 100/50

Bulk "O.E.M." Packaged 1000/500

Common to Both Packages

- Letter **A** denotes 22-18 AWG wire range = Red
- Letter **B** denotes 16-14 AWG wire range = Blue
- Letter **C** denotes 26-22 AWG, 12-10 AWG wire range = Yellow
- Letter **R** preceding the above letters indicates the terminal is insulated
- No letter **R**... no insulation ... no exception!

Distributor Packaged

Part numbers are very descriptive indicating insulation and type, stud size, tongue style and the largest maximum wire that can be put inside.

- If the letter **R precedes** the number, the part is nylon insulated – RA18-6
- If the letter **R follows** the number, the part is vinyl insulated – 14RB-8

EXAMPLE: 10RC-8F

C – Indicates 12-10 AWG

10RC – Vinyl Insulated

8 – Indicates stud size

F – Means a fork tongue terminal

FL – Would indicate locking fork

EXAMPLE: 2RA18X

2 – Indicates a 2 way or butt style connector

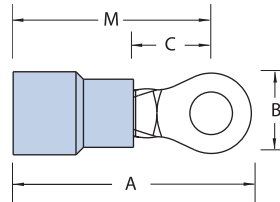

X – Means expanded insulation

Ring Terminals

- Complete line of installing tools engineered to match tool with terminal
- First to gain military approval for pressure connections... many styles available for military applications
- Sta-Kon® products exceed test specification requirements of military, UL and CSA
- Include extra metal sleeve to grip insulation
- Vinyl insulated and bare Sta-Kon® terminals feature brazed seam wire barrels that can be crimped at any place on the barrel circumference
- Can be installed with crimping tools having a single indenter or double indenter (recommended for solid wire)
- Serrated barrel increases grip on wire
- Wire range identification on the tongue of each terminal
- Constructed of electrolytic copper for high conductivity

Fork Terminals

- Fork terminals enable easy installation because the mounting screw does not have to be completely removed
- Brazed-seam barrel is serrated for high pull-out value
- Terminal is high-conductivity electrolytic copper, electro-tin plated. Insulation is colour-coded
- Vinyl-insulated fork terminals have extra-long PVC insulation sleeve for protection and stress relief at wire's flex point

Pin Terminals

- Provide an easy and effective way to terminate stranded wire into European/metric style terminal blocks
- Designed to prevent shorting, wire strand loss and/or wire pullout resulting from improper termination of stranded wire
- Designed to meet emerging global standards which require wire-to-metric style terminal block installations be terminated with a "pin" style terminal
- Available in vinyl insulated, nylon insulated, and non-insulated styles
- All styles offered in 22 AWG to 10 AWG and compatible with existing Sta-Kon® tooling

Parallel Splices

- Wires are laid side by side in the connector, and the connection is made in one crimp
- Offer advantages in simplicity of installation and small size
- One crimp completes the splice

Installation Procedure for "PT" Connectors

Twist wires, insert through serrated barrel of wire joint. (PT60M, PT70, PT70M, PT80.)

Crimp and trim off excess wire with WT161M hand tool.

Screw PT6M insulator firmly onto PT160M barrel.

Wire Joints

High-Temperature Wire Joints

- Rated for temperatures up to 150°C (302°F), 600 V maximum
- Molded, one-piece nylon construction for electrical insulation, UL94-V2
- Brazed copper sleeve prevents separation of connection during crimping
- Internal serrations enable cold flow for increased conductivity and pull-out strength

Heat-Shrinkable Terminals, Splices and Disconnects

- These ring terminals, butt splices and disconnects are self-insulated with heat-shrinkable polyolefin and internally coated sealant
- Upon completed installation, a fully sealed connection is achieved to protect the joint against the degrading effects of galvanic action, corrosion and environmental exposure

Note: Not approved for outdoor use

Disconnects and Male Tabs

- Internal barrel serrations and long barrel provide for maximum tensile strength
- Complete line of installing tools, engineered to match tool with terminal
- Funnel-entry insulators enable easier inserting of wire into barrel
- Colour-coded for easy installation

250 Series – Female Disconnects

- Female disconnect terminals and matching male tabs accommodate a range of #22–#10 AWG, and are available in non-insulated, partially insulated and fully insulated styles, in both nylon and vinyl
- Unique construction of the female disconnect offers long-term dependability
- Brazed-seam serrated barrel provides maximum tensile strength

187 Series – Female Disconnects

- Quick, reliable method of connection to terminal blocks and boards without the use of tools
- Female disconnect terminals and matching male tabs accommodate a range of #22–#10 AWG, and are available in non-insulated, partially insulated and fully insulated styles, in both nylon and vinyl
- Unique construction of the female disconnect offers long-term dependability

Push-In Luminaire Disconnect

Disconnect ballasts under load for safe servicing — in compliance with NEC® requirements

Each year, electricians sustain injuries while attempting to change ballasts without tripping the breaker because they're trying to avoid disconnecting other lighting and equipment from power. That's why recent changes to NEC® and UL standards require a means of disconnecting power to non-residential fluorescent lighting ballasts.

In 2006, Thomas & Betts developed the first UL Listed product to meet this need. Now, in response to customer demand, the new Sta-Kon® Push-In Luminaire Disconnect provides all the same safety benefits as the original, but installs even faster and easier.

Specifications

- Housing: Polycarbonate
- Temperature Rating: 105°C (221°F) max.
- Electrical Rating: 600 V, 4 A max.
- Flammability Rating: UL94V-2
- Contacts: Copper alloy
- Wire Range: #18–#12 AWG solid copper
#14–#12 AWG stranded copper (19 strands or fewer)
- Standards: Complies with 2008 NEC® 410.130(G) and CEC 30-308(4)
- Certifications: UL Listed, CSA Certified

- Enables electricians changing ballasts to easily disconnect incoming power for safe servicing without having to trip the main power breaker
- Installs easily — just strip de-energized wires and insert
- Disconnect halves snap together and separate easily — but won't accidentally disconnect
- Foolproof design eliminates the potential for incorrect installation and reverse polarity
- Fits through 1/2 in. knockouts for easy retrofit
- Ballast hot-lead wire entry is colour-coded black for easy visibility
- Finger-safe on both sides
- For use in all non-residential fluorescent lighting applications and in ordinary location HID lighting applications — both up to 600V, 4A maximum
- Complies with NEC®, CEC, UL and CSA requirements
- Sold in mated pairs (male/line and female/load sides)

This cutaway shows how the Sta-Kon® Luminaire Disconnect grips and holds the pushed-in wires securely after installation

Sta-Kon® Push-In Luminaire Disconnect

Cat. No.	Description	Std. Pkg. Qty.
LD2P-Q	2-Wire Push-In Luminaire Disconnect, Distributor Pack	25
LD2P-D	2-Wire Push-In Luminaire Disconnect, Bulk Packaging	500

Note: If you prefer lead wires instead of a push-in design and/or need a 3-wire disconnect for switching or dimming applications, order the original Sta-Kon® Luminaire Disconnect, 2-wire Cat. No. LD2 (Cat. No. LD2-D for bulk packaging) or 3-wire Cat. No. LD3 (Cat. No. LD3-D for bulk packaging). See following page.

Luminaire Disconnects

Ordering Information

Cat. No.	Description
LD2C-D	2-pole luminaire disconnect (marrettes not included)
LD3C-D	3-pole luminaire disconnect (marrettes not included)
LD2-C	2-pole luminaire disconnect (2 x 4 marrettes 333 /inner bag)
LD3-C	3-pole luminaire disconnect (6 of each marrettes (331 + 333) /inner bag)

Packaging Options

	Cat. No.	Pkg. Format	Std. Pkg. (Min./Mult.)	
BULK	LD2C-D	Box	Sold without marrettes	Inner: 50 per inner bag Outer: 250 per outer box
	LD3C-D	Box	Sold in multiple of 500	Master: 500 in master box
KITS	LD2-C	Bag	Sold with marrettes	Inner: 2 per inner bag Outer: 20 per outer box
	LD3-C	Bag	Sold in multiple of 20	Master: 200 in master box

Disconnect Installation Tool

Faster, easier and safer than manual seating of disconnects!

- Perfect for wire-harness assemblers and panel builders
- Dual-ended with slots to fit red and blue (male and female) or yellow disconnects
- Colour-coded dots for easy matching of disconnect with correct tool end
- Lightweight and only 5-1/8 in. long — fits in a shirt pocket like a pen

This one-of-a-kind tool may be used to seat all sizes of Thomas & Betts disconnects.

DT22-10	Sta-Kon® Disconnect Installation Tool	1

Insulated Ferrules

Features

- Ferrules ensure reliable electrical connections when terminating conductors in screw clamp terminal blocks
- Fraying and breaking of wire strands is prevented and the possibility of an unreliable connection is minimized
- Insulated ferrules prevent conductor breakage due to bending, wire stress or vibration, while facilitating wire insertions into the terminal block clamp
- Ferrules are the preferred alternative to twisting wire stands or tinning the wire end before terminating into a terminal block
- Ferrules are thin-walled copper tubes, which are mechanically crimped onto the ends of stranded wires
- They are easy to use — simply strip the wire, slide the ferrule onto the end of the wire and crimp
- Meets emerging global standards, requiring wire-to-metric style terminal block installations to be terminated with a “pin” style terminal

- Vinyl insulated, nylon insulated, and non-insulated styles
- All styles offered in #22 AWG to #10 AWG and compatible with existing Sta-Kon® tooling

How to Apply a Ferrule

- Strip the insulation from the end of the wire and insert into the insulated end of the ferrule
- Using the designated crimping tool, place the metal shaft into the tool's appropriate slot. Compress the tool to make a crescent-shape depression along the length of the ferrule
- Insert the crimped ferrule into the terminal block
- Tighten the ferrule and wire into the terminal block

Materials

- High-conductivity copper
- Tin plating

Installing Kits

Sta-Kon® Mini-Pack Terminals
Convenient 20-count packaging!

- Wire ranges from #22 AWG to #10 AWG
- Vinyl insulated ring and forked-tongued terminals, female disconnects, butt-type splice connectors

Note: "CP" designates mini-pack quantities. Refer to other catalogue pages for description and dimensional information.

Installing Kits

Sta-Org™ Terminal and Splice Organizer Kit Lightweight, durable, nylon construction!

- Ideal for contractors, OEMs or any other user of terminals and splices
- Slips in a tool box or sits on your bench — only 6.6 in. L x 3 in. dia.
- Bench-mountable (hardware included) Kit Contents
 - (1) blue nylon organizer/carrier
 - (6) see-through nylon canisters with lids

STA-ORG	Sta-Kon® Sta-Org™ Terminal and Splice Organizer Kit	1

Installing Kits

Terminal Kits

For residential or light commercial installations we recommend this proven assortment of popular Sta-Kon® vinyl terminals. This kit includes a WT112M crimping tool.

Kit contains

- 36 2RA18X butt splices for 22 - 16 AWG
- 36 18RA-8F fork terminals for 22 - 16 AWG
- 36 18RA-10F fork terminals for 22 - 16 AWG
- 36 18RA-8 ring terminals for 22 - 16 AWG
- 36 18RA-10 ring terminals for 22 - 16 AWG
- 36 RBB217-200 butt splices for 16 - 14 AWG
- 36 14RB-10F fork terminals for 18 - 14 AWG
- 36 18RA-250F disconnects for 22 - 18 AWG
- 36 14RB-8F fork terminals for 18 - 14 AWG
- 36 14RB-8 ring terminals for 18 - 14 AWG
- 36 14RB-10 ring terminals for 18 - 14 AWG
- 25 RCC217-250 butt splices for 12 - 10 AWG
- 25 10RC-8F fork terminals for 12 - 10 AWG
- 25 10RC-10 ring terminals for 12 - 10 AWG
- 20 RC6 wire joints
- 1 WT112M crimping tool
- 50 833 wire connectors yellow #22-#8 AWG

STAKIT Installing Kit

Perfect for residential or light commercial installations!

- Assortment of popular Sta-Kon® vinyl terminals
- Kit includes a WT112M crimping tool
- Includes cable ties and wire marker book

Kit contains

- 100 2RA18X butt splices for 22 - 18 AWG
- 100 2RB14X butt splices for 18 - 14 AWG
- 50 2RC10X butt splices for 12 - 10 AWG
- 50 10RC-10 ring terminals for 12 - 10 AWG
- 50 10RC-10FL locking fork terminals for 12 - 10 AWG
- 50 10RC-250F disconnects for 12 - 10 AWG
- 100 14RB-10 ring terminals for 18 - 14 AWG
- 100 14RB-8FL locking fork terminals for 18 - 14 AWG
- 100 14RB-250F disconnects for 18 - 14 AWG
- 100 18RA-8F fork terminals for 22 - 18 AWG
- 100 18RA-6FL locking fork terminals for 22 - 18 AWG
- 100 18RA-250F disconnects for 22 - 18 AWG
- 1 WM-0-THRU9 wire marker book
- 1 WT112M crimping tool
- 100 TY525M Ty-Rap® cable ties (approx. length 7-1/2)

Cat. No.	Description	Pkg. Qty.
STAKIT	Assortment of Sta-Kon® vinyl terminals, splices and disconnects. Includes crimp tool, cable ties and wire book marker	1

Note: All splices, terminals and disconnects are vinyl insulated.

Installing Kits

Recommended Tools

The Shure-Stake® mechanism on mechanical ratchet tools and power tools prevents the dies from releasing the terminal until the proper compression has been completed. With this method, an operator achieves a reliable crimp every time. Thomas & Betts tooling techniques correctly match tools, wire size, and terminal to produce optimum mechanical and electrical performance.

WT161M	A, B, C, PT non-insulated terminals and splices; includes plier grip and cutters	
WT2000	A, B, C, AB, PT, RA, RB, RC insulated and non-insulated terminals and splices; includes wire cutters, bolt cutters and wire stripper	

Application Tools

The proper installation procedure for the quality-assured connection!

The proper installation of terminals, splices and connectors is very important to the efficient performance of an electrical system. The properly installed connector will enable good conductivity through the termination. Certain basic requirements must be met to make a good termination.

- Strip the insulation carefully to avoid nicking or cutting conductor strands
- Strip the insulation to the proper length so the conductors can be inserted fully into the connector barrel; the wire/cable should be visible in the inspection hole of the lug

A poor termination results in a high-resistance connection.

A poor connector installation may cause damage or failure of an entire system.

Installation Procedure

- Strip the insulation carefully to avoid nicking or cutting conductor strands.
- Strip the insulation to the proper length so the conductors can be inserted fully into the connector barrel; the wire/cable should be visible in the inspection hole of the lug.
- Train the wires to eliminate fanning of strands.
- Open handles fully.
- Insert terminal in proper die nest and locate it as shown on the right. When crimping a butt splice, position in proper die nest with window facing indenter.
- Close handles slightly to secure terminal. Do not deform terminal.
- Insert properly stripped wire into terminal.
- Complete crimp by closing handles.

Shure-Stake® tools are matched to terminals

ERG4001

Safety Warning: Keep fingers and hands away from mechanism during crimp function.

Application Tools

Redesigned family of termination tools sets a new standard for manual crimping tools!

The most comfortable crimp available from a manual compression tool!

Sta-Kon® Comfort Crimp™ Compression Tools previously set the standard for manual crimp tools. Now, Thomas & Betts engineers have made a great line of tools even better with the newly redesigned Sta-Kon® Comfort Crimp™ Compression Tools. We kept all the performance features that made the tools industry leaders such as the Shure-Stake® mechanism and interchangeable dies with colour-coded die nests, and focused on creating the best possible user experience in terms of comfort and reduction of strain.

Ergonomic handles position the user's hands correctly to minimize the risk of strain, and soft, over-molded grips cushion fingers and palm for user comfort. A new Crimp-Assist™ foot stabilizes the tool when the user needs to place it on a work surface for leverage to crimp larger connectors. Best of all, the redesigned Comfort Crimp™ tools require 25% less handle force to complete the crimp cycle than the previous generation — and up to 75% less handle force than competing tools!

Requiring the lowest handle force of any tool in its class, the new Comfort Crimp™ family provides maximum comfort to installers, without sacrificing the durability or performance associated with Thomas & Betts tools.

- Perfect for OEM, MRO and field use
- UL Listed for use with Sta-Kon® connectors
- Shure-Stake® mechanism ensures a complete crimp cycle before release for a proper crimp every time
- Colour-coded die nests for easy matching with Sta-Kon® insulated terminals
- Creates integrity dots for quick verification of proper crimp
- Advanced manufacturing methods for improved durability and tool life
- Lanyard hole in handle for easy tethering to workstation
- Calibration service available through T&B Tool Services

Weight: 55 lb.
Air Pressure: 90–125 psi input air supply

Application Tools

BAT22-6NV2 Battery-Powered Crimping Tool

The Sta-Kon® BAT22-6NV2 is motorized and automatic for effortless, single-lever crimping.

This is an excellent tool for various vertical markets including panel builders, system integrators, data centers, utilities and various other OEMs and MROs.

The lightweight, ergonomic design minimizes the risk of repetitive motion injuries that can occur with traditional hand crimping tools.

- 150,000 cycle lifespan
- Extremely light and efficient
- Crimps both Sta-Kon® and Dragon Tooth™ terminals
- Comes complete with extra battery, charger and carrying case
- Powerful lithium-ion battery with charge-level indicator
- Single-lever motorized operation for easy manual preclamping, automatic crimping and auto-retract functions
- Motor-stall protection in case of faulty operation
- LED work light illuminates work areas

Included Accessories

- Sturdy, plastic carrying case for portability
- Two 10.8 V lithium-ion batteries and battery charger
- Sturdy tray for convenient storage of crimp dies

Cat. No.	Description	Pkg. Qty.

DIE2007	Insulated #8–#6 AWG Sta-Kon® Terminals (Tubulaire Only)	

* Dies sold separately.

Note: The dies for the BAIR22-6, PAIR22-6 and BAT22-6 are interchangeable.

Note: Battery-powered Tools BPI4230OCR, BPLT6BSCR and BPLT62BSCR can also be used to crimp non-insulated Sta-Kon® terminals.

Application Tools

BAIR22-6 Bench-Mounted Air Tool

Crimps #22–#6 AWG terminals!

- 1.8 tons output force at 100 psi
- Bench-mounted heavy-duty air tool
- Short cycle time
- Shure-Stake® mechanism
- Foot actuated
- Accepts T&B standard hand tool dies
- Installs Sta-Kon® and Spec-Kon™ terminals as well as ferrules and Dragon Tooth™ connectors

Cat. No.	Description	Pkg. Qty.
BAIR22-6	Heavy-duty, high-speed production tool installs a wide range of Sta-Kon® terminals, from #26–#6 gauge; uses the DIE2000 Series dies for both non-insulated and insulated terminals; supplied complete with foot pedal, air hose/air lubricator	1
Crimp Dies*		
DIE2001	Insulated #22–#10 AWG Sta-Kon® Terminals	1
DIE2002	Non-Insulated #22–#10 AWG Sta-Kon® Terminals	
DIE2005	Non-Insulated #16–#10/#8–#6 Sta-Kon® Terminals (Tubular Only)	
DIE2007	Insulated #8–#6 AWG Sta-Kon® Terminals (Tubular Only)	

* Dies sold separately.

Note: The dies for the BAIR22-6, PAIR22-6 and BAT22-6 are interchangeable.

Note: Battery-powered Tools BPI42300CR, BPLT6BSR and BPLT62BSR can also be used to crimp non-insulated Sta-Kon® terminals.

Air-Operated Bench-Mounted Tool

Crimps #8 AWG–250 kcmil!

Convenience and Economy

The tool accepts a full range of interchangeable dies, the same as used in the TBM6 or TBM6S tools. To install the dies, simply pull the spring-loaded pin and remove the indentor die. Then, flex the retaining spring and remove the die nest.

Shure-Stake® Mechanism Means Quality Connections

The Shure-Stake® mechanism senses inlet air pressure, and if insufficient, is designed to prevent the tool from cycling. Thus you avoid “undercrimping.” An 85–90-psi air pressure source is required.

Safety Features Increase Productivity, Reduce Downtime

Safety features include a guard over the die area, an air shutdown switch activated by a slight push with the finger and a foot pedal that’s enclosed to prevent accidental tool operation. In addition, the tool may be bench-mounted for stability and control. For convenience when crimping large size terminals on heavy wire, the head assembly may overhang the workbench.

Cat. No.	Description	Pkg. Qty.
25000	This compact heavy-duty air tool installs nylon insulated Sta-Kon® terminals on wire sizes from #8 AWG to 250 kcmil; non-insulated styles are also installed just as quickly and dependably; heavy-duty air tool installs non-insulated and insulated Sta-Kon® terminals from #8 AWG to 250 kcmil	1

Note: This tool uses the same dies as the TBM6 and TBM6S hand tools on page B45.

Application Tools

Catamount® Terminals

Catamount® Terminals – Now in Convenient, Spillproof, Re-Usable Packaging!

While poly bags keep their contents dry, they don't offer much other protection, and they aren't environmentally friendly. That's why Catamount® terminals now come in sturdy plastic containers that safeguard the connectors inside against crushing and can be re-used or recycled when empty. T&B is always adding value to its products. With the introduction of a durable plastic container, the value of T&B's Catamount® terminals has been significantly enhanced. No more lost or spilled terminals because of inadequate packaging.

Catamount® Terminal Tools

WT111M

WT112M

ERG1-WS

CM2000A

TBM6S

Cat. No.	Description	Pkg. Qty.
WT111M	Pier tool with cutter for 22 - 10 AWG non-insulated terminals	1
WT112M	Pier tool with cutter for 22 - 10 AWG insulated and non-insulated terminals, splices and disconnects	
TBM6S	Toggle type hand tool with Shure-Stake® for 8 - 6 AWG, vinyl insulated terminals (dies sold separately)	
ERG1-WS	Ergonomic wire stripping tool	
CM2000A	10 in. ratchet crimping tool for insulated terminals (22 - 10 AWG)	

Polycarbonate Insulated Ring Terminals

Technical Information

Material	Electrolytic copper
Plating	Tin-plated
Marking	Wire size and bolt size stamped on the tongue
Metal barrel	Brazed seam to prevent barrel separation
Insulation	PC = Polycarbonate
Temperature resistance	+115°C / +125°C
Colour coding of the insulation	According to the wire size
Cable insertion	Easy entry

Polycarbonate Insulated Fork Terminals

Technical Information

Material	Electrolytic copper
Plating	Tin-plated
Marking	Wire size and bolt size stamped on the tongue
Metal barrel	Brazed seam to prevent barrel separation
Insulation	PC = Polycarbonate
Temperature resistance	+115°C / +125°C
Colour coding of the insulation	According to the wire size
Cable insertion	Easy entry

Ordering Information

Vinyl Insulated Ring Terminals DIN 46237

Technical Information

Material	Copper
Plating	Tin-plated
Marking	Wire size and bolt size stamped on the tongue
Metal barrel	Brazed seam to prevent barrel separation
Insulation	PVC = Polyvinylchloride (Vinyl)
	Ideal for harsh environments, provides excellent chemical, impact and abrasion resistance
Max. electrical rating	+75°C 600 Volts max
Colour coding of the insulation	According to the wire size

Tools

- Ergonomic ratchet style hand tools used for installing insulated and non-insulated terminals
- Specially designed ergonomic handles distribute the crimping force more evenly across the user's hands. This helps to reduce the risk of Carpal Tunnel Syndrome, the cause of almost one in two industrial injuries
- Ratchet design greatly reduces handle forces over conventional hand tools and incorporates the Shure-Stake® mechanism which ensures a full crimp cycle every time
- Most dies incorporate wire range mark for easy inspection (insulated only)
- Colour-coded die nests (insulated only) make terminal and die nest selection easy
- The product design and engineering results in a long lasting precision tool
- Exists in 2 versions: with interchangeable dies or with fixed dies

Ergonomic Hand Tools with Fixed Die

Product Ref.: ERG2001A

Ergonomic fixed die tool, with three colour-coded die nests for easy selection

For **insulated terminals** from:

0.5 to 1.5 mm² red

1.5 to 2.5 mm² blue

4.0 to 6.0 mm² yellow

Shure-Stake™ mechanism

Length: 255 mm

Weight: 560 g

Product Ref.: ERG2510

Ergonomic fixed die tool with 2 die nests

For **insulated terminals** and **insulated bootlace ferrules**

from: 0.25 to 0.5 mm²

0.5 to 1.0 mm²

Shure-Stake™ mechanism

Length: 220 mm

Weight: 430 g

Tools

Metric Crimping Tools

An extensive range of tooling is available, suiting a variety of requirements, to crimp the following terminals:

- Insulated terminals and bootlace ferrules
- Non-insulated terminals
- Copper tube terminals

Different types of tooling are offered, depending on volume and application:

- Plier type hand tools for occasional applications (“Do-It-Yourself” users)
- Standard hand tooling for low to medium volume applications
- Ergonomic hand tooling for low to medium volume applications, where high, repeatable quality is essential
- Hydraulic tooling for heavy-duty applications
- Smart tools where no die change is necessary

Standard Crimping Tools

Product Ref.: WT52

Plier type tool

For **insulated** and **non-insulated** terminals from 0.5 to 6.0 mm²

Incorporates wire stripper and bolt cutters

Recommended for “Do-It-Yourself” applications only

Length: 225 mm

Weight: 200 g

Product Ref.: WT2124Y

Ratchet type hand tool, fixed die

For **insulated** and **non-insulated** terminals

from: 0.5 to 1.5 mm² red

1.5 to 2.5 mm² blue

4.0 to 6.0 mm² yellow

Built in **Shure-Stake®** mechanism to ensure a full compression every time

Length: 228 mm

Weight: 533 g
