1200 Series™
Pedestal Style Service Fittings

Single Service Fittings for Infloor Systems

Wiremold® 1200 Series™ Service Fittings are bell-cap style pedestal fittings used in single service power and communication applications. The split bell cap design protects the electrical or communication cabling exiting the fitting from damage. Multiple fittings are required for two or more services.

1200 Series Service Fittings are designed to be threaded directly into a 2" IPS [51mm] preset or afterset insert to activate Walkerduct® Underfloor Duct. It can also be applied as an afterset on Walkercell® Cellular Raceway. 1200 Service Fittings are suitable for new and renovation construction and is available in aluminum and brass finishes. All power fittings are UL listed to U.S. safety standards.

A 1200 Series Service Fitting installation on a carpeted floor.

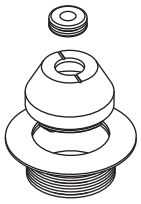

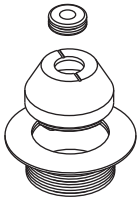

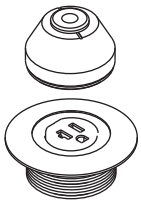

FEATURES & BENEFITS

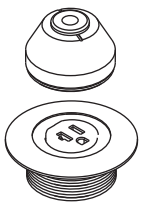

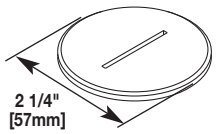

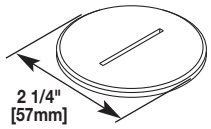

- **Split bell cap with grommet.** The cap splits into two pieces to surround a power cord and plug or communication cable. It helps to keep wiring connections from being disconnected while in service. The grommet provides a protected exit for wiring.
- **Brushed finish.** Brass or aluminum material is durable and maintains its good looks even after years of service.
- **Removable bell cap.** The fitting can be used without bell cap where a flush activation is desired.

The bell-cap, pedestal style components of 1200 Series Service Fittings.

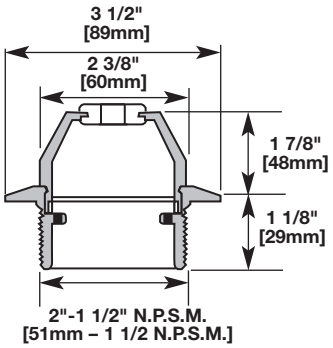

1200 Series Service Fittings Ordering Information

Catalog No./Item	Description/Specifications
1204BF 	**Communication Service Fitting** – Brass finish communication fitting furnished with split bell cap and grommet. No device plate is included.
1204AL 	**Communication Service Fitting** – Aluminum finish communication fitting furnished with split bell cap and grommet. No device plate is included.
