

# UL/CSA Listed Box Extenders

Made in USA 

**NEW!**  
Large flange  
BE1X

*THE Answer for Set Back Electrical Boxes*

Arlington's non-conductive box extenders extend set back metal or non-metallic electrical boxes up to 1-1/2 inches, the easy way!

They work with any single gang device and most steel and non-metallic outlet boxes, and provide a level, fully supported wiring device that's flush with the wall surface. In steel boxes they prevent arcing and shorting by creating a barrier between the box and device screws.

Our newest box extender, the **BE1X**, has a slightly larger flange that provides extra device support when the wall opening is miscut or oversized. It accommodates midi or maxi cover plates and **costs the same as our 'regular' single gang BE1**. If you normally use a midi plate this is the box extender for you!

**BE1X**  
**Trimable**  
to fit standard  
wall plates

- Complies with NEC 2014, article 314.20 (set back boxes)
- 2-hour fire rating
