

# Plastic Enclosure Design Modifications

Please be advised that we recently made several design modifications to the 30" and 42" Plastic Enclosures. These updates were made to enhance the installation experience and compatibility with the On-Q Plastic Enclosure Trim Rings (ENP3001, ENP4201).

## Modifications Include:

- Flat Keyhole Hinge Design – on both the 30" and 42" Plastic Enclosures
- Padlock Tab Removal – 30" Plastic Enclosure only
- Reinforced Door Latch – 30" Plastic Enclosure only
- Reduced Padlock hole on Door – 30" Plastic Enclosure only.

These design changes will affect the installation process of the enclosure door. Please see details on the next page and download the installation instructions ([link](#)) for more information.

# Plastic Enclosure Design Modifications

NEW HINGE DESIGN

REMOVAL OF PADLOCK

REDUCED PADLOCK HOLE ON DOOR

## INSTALLATION OF NEW FLAT KEYHOLE HINGE

Applies to both 30" and 42" Plastic Enclosure

1. Utilizing the included mounting screws, affix the top screw halfway into the predrilled hole in the enclosure frame
2. Rest the top door hinge onto the screw and fasten.
3. Fasten the remaining hinge screws to the enclosure taking caution not to over tighten.

## INSTALLATION OF NEWLY DESIGNED DOOR ON AN OLD MODEL ENCLOSURE

Applies to the 30" Plastic Enclosure only

As we're in the process of rolling out these redesigned products, you may have instances where you need to install a NEW door on an OLD enclosure. In this case, the padlock tab must be removed to get a strong closure on the door. This added step is only temporary as we complete this design transition.

1. Utilize a rotary blade / Dremel tool to cut off the padlock tab at the base, leaving it flush with the enclosure. If a rotary tool is unavailable, wire cutters may be used by clipping at the base from both the bottom and top of the padlock tab.
2. To affix door to the enclosure, use steps above as outlined in "**Installation of New Flat Keyhole Hinge**"
3. The door will close and latch to enclosure. To lock the door to the enclosure, apply the included Philips head screws to the holes located on the top and bottom corners of the door.
